

First of all please let us apologize for the delay in communicating to all of you. Our first instinct was to make contact with our “friend s and family” immediately, but were not able to do so.

We would like to take this opportunity to formally announce a change in ownership and management of the Front Range Gun Club. Cindy and I have worked diligently to finalize a purchase of the building that the gun club is operated in, but due to circumstances beyond our control, we were not able to effect the purchase in the time specified. In accordance with the terms of our lease with the building owners, the member contacts have been assigned to the new owners; who have established a new business that will operate the range, under GunSmoke LLC. The new owners have informed us that they will be honoring all existing member contracts. In accordance with privacy issues and laws your personal banking and background check information was not passed to the new owners. You will be contacted by the new management in the very near future to secure the necessary information.

Cindy and I feel like we have made countless lifelong friends at the Club and are very sad that we must leave the club as owners. However, in light of the terms of the lease that we signed, we must move on and take our memories and friends with us as we look towards to other exciting opportunities and training in the region. Many of you have our personal and business contact information, please stay in touch, we look forward to hearing from you.

We would like to express a very special thank you to “Mamba” the Administrator who manages the Forum. This is a great resource for networking and we invite Mamba to continue moderating this forum. Thank you Mamba!
